States

#### ABSTRACT

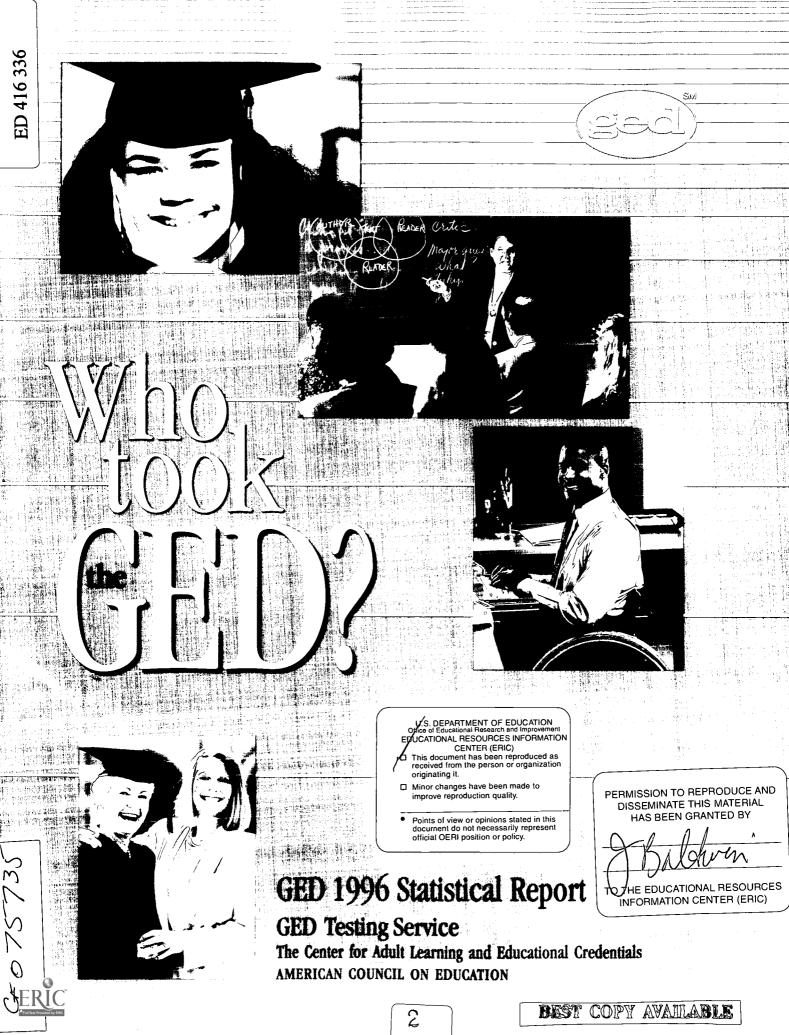

The 13 tables and figures in this report provide summary information about those who took the General Educational Development (GED) Tests in 1996 and the jurisdictions that administer those tests. Most tables summarize information for the United States and Territories, Canada, GED Testing Service, and Program Total. Each table is arranged to provide data within the following umbrella topics: percent changes from 1995-1996; number tested, number completing tests, and number meeting score requirements; people tested and credentials issued by age groups; special test editions and testing accommodations; formal education and future plans; trends in participation and in credentialing; participation and credentialing rates; and minimum score requirements and testing policies. The publication also includes the names, addresses, and telephone numbers of the GED administrators and participating jurisdictions and a list of 24 selected publications and a GED publications order form. Some highlights of the statistics include the following: (1) in 1996, 758,570 persons worldwide completed the GED, a 5 percent rise over the previous year; (2) 524,482 earned high school equivalency credentials by passing the GED Tests; and (3) 14 percent more persons required special accommodations for disabilities than in the previous year. (KC)

GED 1996 Statistical Report

Edited by Janet Baldwin

**GED Testing Service** 

The Center for Adult Learning and Educational Credentials AMERICAN COUNCIL ON EDUCATION

## Foreword

ACH NEW YEAR, PUBLICATION OF WHO TOOK THE GED? IS AN EXCITING event, because it reminds us of the incredible diversity of GED test-takers past and present. From top-ranking military officials to country western singing stars, from graduate students to college professors, from business leaders to grocery clerks, the GED represents renewed opportunity for hundreds of thousands of individuals each year.

The one description that seems to apply to all of those who take the GED Tests is that they are adults in transition. Having left formal schooling before completion, they recognize that a high school credential is an important key to further education, training, and better jobs. In fact, about two in every three adults who take the tests report they plan to pursue education beyond the high school level. Passing the GED Tests transforms their aspirations into demonstrated accomplishment, validates their educational abilities, and signals their motivation to improve their chances in life.

Indeed, for most test-takers, the GED is not an educational end point, but rather the beginning of further education and training. Each year, we try to illustrate this fact by including photographs typical of those who take the GED Tests and the environments in which they study and work. Though not necessarily photos of actual

test-takers, they represent the faces that lie behind the tables and num-

bers found in this annual report.

Veteran readers of Who Took the GED? will notice some changes in the categories reported in each table. One major change is the addition of the Province of Ontario, Canada. Ontario joined the program in 1996, following a preliminary pilot study in 1995, bringing the total number of participating Canadian jurisdictions to eleven. There were also changes in some of the categories of persons whose tests are scored by the GED Testing Service. For example, the previous category, Foreign Nationals Overseas, has been eliminated. In addition, the category U.S. Civilians Overseas has been replaced with two new categories, U.S. Embassies and Overseas: Non-Military. The previous category, U.S. Military Overseas has been renamed, Overseas: Military.

Calendar year 1996 was a most eventful year for the GED Testing Service, marking a season of change at the American Council on Education. During the fall of 1996, Stanley O. Ikenberry assumed the

ACE presidency, Susan Porter Robinson was appointed interim director of the Center for Adult Learning and Educational Credentials, and Joan Auchter was appointed interim director of the GED Testing Service. The end of 1996 also marked a change to a new higher minimum passing score requirement. This new requirement—a minimum of 40 on each test AND a mean of 45 over the entire battery—went into effect January 1, 1997.

Throughout these changes, some familiar faces labored to produce Who Took the GED? The GED 1996 Statistical Report, and to them we owe a special thanks. Debra Louallen-Cole has once again coordinated production and directed data collection and quality control activities. Sen Qi continued to refine and extend procedures for data analysis and for producing the tables and graphs. Zenitta Jones again lent her skills to data entry and verification. Most importantly, production of this report was a collaborative effort among our dedicated GED Administrators (whose names appear beginning on page 34), Chief Examiners, advisors to the GED program, and our staff. All who participated in producing this report wish to thank the more than 867,000 individuals who invested their time and energy in taking this year's GED Tests. It is, as always, their hope and vision that has inspired and directed our efforts in this project.

GED candidates report a variety of reasons for not completing high school. In 1989. reasons given as most important were disengagement from school (24 percent), marriage or pregnancy (20 percent), bome and family problems (18 percent), and employmentrelated reasons (15 percent). These findings, and those presented in photograph captions elsewbere in this report, are based on published findings from national studies of GED candidates (see p. 40 for further information).

## Introduction

The GED Testing Service Joan E. Auchter, Interim Director

THE TESTS OF GENERAL EDUCATIONAL DEVELOPMENT (GED) PROVIDE ADULTS who did not complete high school with an opportunity to earn a high school equivalency diploma. By taking and passing a series of five tests in writing skills, social studies, science, interpreting literature and the arts, and mathematics, adults demonstrate they have acquired a level of learning that is comparable to that of high school graduates.

The GED Tests certify the attainment of subject matter knowledge and skills associated with high school completion. The GED credential reflects the attainment of academic skills and literacy proficiencies widely viewed as necessary for social and economic advancement and for exercising the rights and responsibilities of citizenship.

The GED Tests were first developed in 1942 to provide returning World War II veterans who had not earned a high school diploma before entering military service with an opportunity to earn a high school credential. The purpose of the GED Tests, essentially unchanged for more than 50 years, is to measure the academic skills and knowledge developed in a four-year program of high school education in the core content areas of United States and Canadian high school curricula. Recognized nationwide in the United States and in Canada by employers and institutions of higher learning, the GED program has served as a bridge to education and employment opportunities for millions of adults since 1942. An estimated 12.6 million people have earned high school equivalency diplomas since the program began. In 1996, more than 750,000 adults completed the GED test battery and more than 520,000 adults obtained high school credentials based on the tests. About one in seven high school diplomas issued in the United States each year is based on the GED Tests.

A program of the American Council on Education's Center for Adult Learning and Educational Credentials, the GED Testing Service develops the GED Tests and collects, produces, and disseminates research information on those who take, as well as those who pass, the GED Tests. In addition, the GED Testing Service contracts with nearly 3,500 Official GED Testing Centers in the United States, Canada, and overseas to provide test materials and to monitor services to examinees. The GED testing program is jointly administered by the GED Testing Service of the American Council on Education and each participating state, provincial, or territorial department or ministry of education.

The real story of the GED Testing Service, however, is in the people it serves—the individuals who take the tests to fulfill their goals and aspirations. For these individuals, the GED Tests truly represent a second opportunity. As you read this report you will find that those who take the GED Tests are a richly diverse group. Some have recently left school. Others have been out of school for several years. While most take the tests to qualify for further education, others hope that passing the GED Tests will encourage their children or their grandchildren to stay in school.

Many who take the GED Tests are preparing to enter a community college or fouryear university. In fact, about one in twenty first-year college students each year is a GED graduate. GED graduates have become successful office workers, mechanics, college professors, military leaders, business people, writers, and artists.

#### The Center for Adult Learning and Educational Credentials Susan Porter Robinson, Interim Director

**♦ OUNDED IN 1942, THE CENTER FOR ADULT LEARNING AND EDUCATIONAL** Credentials pioneered the evaluation of education and training attained outside the classroom. For 55 years, the Center has championed the concept of lifelong learning through its three main programming activities: high school credentialing, college credit recommendations, and educational recordkeeping.

#### High School Credentialing

Many adults who dropped out of high school have later acquired a comparable level of learning while on the job or at home. In an effort to help these adults earn a high school credential, the Center offers the Tests of General Educational Development (GED). The GED Tests are a battery of examinations that measure the general academic skills and knowledge usually acquired in a four-year high school program of study.

#### College Credit Recommendations

In step with its commitment to lifelong learning, the Center administers three programs that recommend academic credit for jobrelated education. The ACE/PONSI Program recommends college credit for workplace training offered by business and industry, labor unions, associations, and government agencies. Its counterpart for the armed services, the Military Evaluations Program, helps thousands of servicemembers and veterans earn credit for the college-level learning

they've acquired while on active duty. Likewise, the Credit by Examination Program recommends college credit for testing and certification programs offered by national organizations.

#### Educational Recordkeeping

To keep track of these college credit recommendations and other training, the Center offers three computerized recordkeeping services. The Registry of Credit Recommendations offers adults a computerized record of their credit recommendations, including those made by the ACE/PONSI and Credit by Examination programs. The National Registry of Training Programs provides a transcript service for adults who are pursuing continuing education units (CEUs) for professional development, career advancement, or state licensing requirements. Lastly, the Army/ACE Registry Transcript System provides enlisted soldiers and National Guard members with an individualized record of their military educational experiences. Taken together, these transcripting systems help college and other officials recognize workplace learning along with the responsibilities and skills registry participants gained while on the job.

#### The American Council on Education Stanley O. Ikenberry, President

HE AMERICAN COUNCIL ON EDUCATION (ACE), FOUNDED L in 1918, is the nation's umbrella higher education association. ACE is dedicated to the belief that equal educational opportunity and a strong higher education system are essential cornerstones of a democratic society. Its approximately 1,800 members include accredited, degree-granting colleges and universities from all sectors of higher education and other education and education-related organizations. ACE is a forum for the discussion of major issues relating to higher education and its potential to contribute to the quality of American life. ACE maintains both a domestic and an international agenda and seeks to advance the interests and goals of higher and adult education in a changing

environment by providing leadership and advocacy on important issues, representing the views of the higher and adult education community to policy makers, and offering services to its members.

Literacy skills and educational attainment are strongly related. Thus, improving literacy skills may play an important role in narrowing the college enrollment and completion gaps between whites and people of color.

## Gathering the Data

THE COLLECTION OF DATA FOR THE GED ANNUAL STATISTICAL REPORT IS A joint responsibility of GED Administrators, GED Chief Examiners, and the GED Testing Service (GEDTS). This data collection is international in scope, requiring the cooperation of educators and testing professionals throughout North America and abroad. Currently, nearly 3,500 GED Testing Centers are in operation in the 50 states, the District of Columbia, nine U.S. Territories, 11 participating

Canadian provinces and territories, as well as on military bases in the U.S. and overseas, in correctional institutions, and in VA hospitals.

In the fall of 1996, the GEDTS research staff began to plan for the production of *Who Took the GED? The GED 1996 Statistical Report*. During the fall, data collection forms were sent to GED Administrators and GEDTS updated its computer programs to generate the statistical tables. In February 1997, GED Administrators sent their jurisdictional reports to GEDTS. GEDTS staff checked the data for accuracy and entered this information into our national database. In March, preliminary tables were prepared and sent to GED Administrators. GED Administrators reviewed their own jurisdiction's data for accuracy and returned Statistical Report Proof Forms to GEDTS with their final revisions. During March, GEDTS updated all statistical databases to reflect these revisions. In April and May, we generated and edited all statistical tables, prepared graphs, wrote text, and printed the final report.

The GED Annual Statistical Report presents tabulations of the numbers and percents of all persons who took and passed the GED Tests in a calendar year within each jurisdiction. Procedures for collecting these data can

differ greatly from one jurisdiction to another. For example, in a calendar year,

Texas, California, and Michigan each collects summary reports on thousands of examinees from hundreds of testing centers. In contrast, American Samoa, Guam, Newfoundland, and Prince Edward Island each collects data on hundreds of examinees from only one center. Furthermore, some jurisdictions rely on computerized scoring and recordkeeping, while others perform these tasks by hand.

In reviewing the tables in Who Took the GED? The GED 1996 Statistical Report, it is useful to bear in mind that local conditions—such as

extreme weather—as well as a jurisdiction's administrative policies, procedures, and education funding levels can influence the number of persons in a given year who take the GED Tests, complete the test bat-

tery, meet score requirements, and receive credentials. As we work to improve the quality, clarity, and usefulness of the data we collect, we encourage readers to write to us to suggest ways we can improve this report.

According to a national longitudinal study published in 1993, more than two in five GED graduates (43 percent) attended two- or four-year colleges after receiving their credential.

## How to Use This Report

E ARE ALL USERS OF DATA AND CONSUMERS OF INFORMATION. TO MAKE informed educational and policy decisions in this time of rapid social and economic change, we require accurate and up-to-date information about our programs. The GED Testing Service has produced annual statistical reports profiling GED test-takers for every calendar year since 1958. In response to growing demands for more information about our program, we revised the GED Annual Statistical Report in 1993 to make it easier to read. The positive reactions of our readers to these revisions encourage us to continue improving the usefulness and readability of this report.

Throughout the report, the term GED test-taker refers to people who have taken at least one of the GED Tests. The term GED completer refers to people who have taken all five tests in the GED battery. The term GED graduate refers to people who have earned high school credentials based on passing all five tests in the GED battery. Since 1994, the Annual Statistical Report has included the number of per-

sons completing the entire battery of five GED Tests. It is useful to note that about 13 percent of those who take the tests each year do not complete the entire battery. Thus, they may be counted again in subsequent years. GED test-takers must take all five tests in order to meet their jurisdiction's score requirements for a high school equivalency credential. The number of persons completing all five tests in the battery provides the basis for calculating the pass rate for the program.

For readers new to the GED Annual Statistical Report, the data presented in Tables 1-13 provide summary information about those who take the GED Tests and the jurisdictions that administer those tests. Most tables summarize information for the U.S. and Territories, Canada, GED Testing Service, and Program Total. Readers can compare information across categories, jurisdictions, and even years. Each table is arranged to provide data within the following umbrella topics: percent changes from 1995-1996 (Table 1); number tested, number completing tests, and number meeting score requirements (Table 2); people tested and credentials issued by age groups (Tables 3-4); special test editions and testing accommodations (Tables 5-6); formal education and future plans (Tables 7-8); trends in participation and in credentialing (Tables 9 and 11); participation and credentialing rates (Table 10); and minimum score requirements and testing policies (Tables 12-13).

The names, addresses, and phone numbers of the GED Administrators and participating jurisdictions are included on pages 34-39. A list of selected publications and a GED publications order form follows on pages 40 and 41.

This report was developed with several audiences in mind. For those who rely on the content of the statistical tables for program status and trend information, the tables and graphs are designed to provide comparisons across categories, jurisdictions, and years. For those interested in using this report to learn about the purpose of the GED program and the diversity of those who take the GED Tests, photographs, expanded text, and informative captions are included.

## 1996 Statistical Report Highlights

#### Trends in GED test-taking

In 1996, 758,570 persons worldwide completed the GED battery, a nearly five percent rise over the previous year. (Table 1) The number completing the battery in 1996 represents the highest level since the program began collecting this information (Table 11). Other notable findings include:

- In the U.S. and territories, the number of persons completing the GED battery increased by five percent. Ten U.S. jurisdictions reported increases of at least 15 percent: Mississippi (31 percent), District of Columbia (27 percent), Vermont (25 percent), Illinois (24 percent), Idaho (23 percent), North Dakota (18 percent), Texas (18 percent), Nevada (18 percent), Nebraska (16 percent), and Arizona (16 percent). Two U.S. territories also reported large increases: Virgin Islands (48 percent) and Micronesia (34 percent). (Table 1)
- In Canada, the number of persons completing the battery increased by nearly two percent and three jurisdictions reported increases of more than 15 percent: Northwest Territories (112 percent), Newfoundland (33 percent), and Prince Edward Island (19 percent). (Table 1)
- Only two jurisdictions worldwide reported decreases of 15 percent or more in the number completing the battery. These were: Alaska (16 percent) and Virginia (20 percent). (Table 1)
- Among those completing the battery, more than half a million (542,578), or 72 percent, met their jurisdiction's score requirements for the GED credential. (Table 2)
- More than half a million adults (524,482) earned high school equivalency credentials based on passing the GED Tests. This number surpasses the previous record in 1995 and brings to more than 12.6 million the estimated number of people who have received GED credentials since 1949. (Table 11)

#### Age, formal schooling, and academic goals

- More than three in four credentials (78 percent) issued worldwide are earned by persons under the age of 29. (Table 4)
- As in previous years, two in three (67 percent) examinees reported they completed grade 10 or higher before leaving formal schooling. For well over one in three (37 percent), the highest grade completed was grade 11 or higher. (Table 7)
- In 1996, 547,096 examinees reported they planned further education and training beyond the high school level. This number is the largest number planning further study in the program's history. (Table 8)

#### Special editions and special testing accommodations

- The total number of persons who took a special edition of the GED Tests-audiocassette, braille, or large print-decreased by 3 percent in 1996, to 2,305. (Table 5)
- The number of accommodations to standard testing conditions for persons with documented disabilities—such as extended time, use of special reading or optical devices, alternative answer-recording methods, and other adaptations-increased by 14 percent over the number reported in 1995. (Table 6)

表示

A recent national study found that males and females, adults in different age groups, and individuals with and without disabling conditions (that is. conditions that prevented them from participating fully in everyday activities) were equally likely to pass the GED Tests.

TABLE I
GED Participation and
Credentials Issued:
Percent Change From
1995 to 1996

- Percent change is calculated by subtracting the number reported for 1995 from the number reported for 1996, then dividing the difference by the number reported for 1995.
- For all tables in this report, the number taking the tests and the number of credentials issued in Colorado in 1996 are underreported from the actual number of persons tested and receiving credentials that year.
- For all tables in this report, the 1996 statistics reported for New Jersey are based on preliminary and incomplete data.
- 4. This number was underreported for that year.
- 5. For all tables in this report, the number of persons counted for Micronesia includes data from The Commonwealth of the Northern Mariana Islands, Republic of the Marshall Islands, Republic of Palau, Kwajalein, and The Federated States of Micronesia (which include Pohnpei, Kosrae, Truk, Yap, and The State of Chuuk). Please note: Micronesia is an independent country.
- 6. For all tables in this report, the 1996 statistics for Ontario and for Canada include 185 persons who wrote the tests as part of a pilot study in the Province of Ontario in 1995. These individuals were not counted in the GED statistics for that year. Of these, 151 persons earned a high school credential issued by Ontario's Ministry of Education and Training. Ontario became a participating jurisdiction in 1996.
- 7. N/A=Not Available.
- 8. GEDTS categories (Tables 1-3; 5-8):

U.S. Embassies: U.S. and Canadian citizens tested in U.S. embassies overseas. Persons in this category were previously reported in the category U.S. Civilians Overseas.

Overseas: Non-Mil.: Military family members and U.S. federal government personnel tested on U.S. military bases overseas. Persons in this category were previously reported under U.S. Civilians Overseas.

Overseas: Military: U.S. Military personnel tested on U.S. military bases overseas.

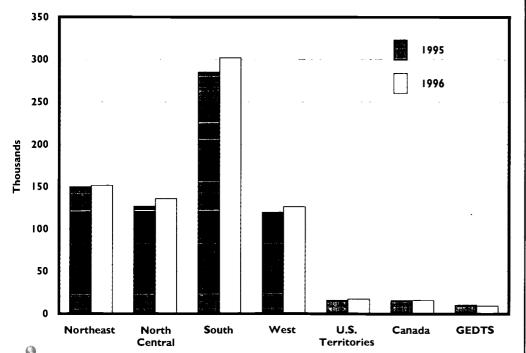

CONUS Military: U.S. military personnel tested on military bases in the continental United States. This category may include some non-military personnel tested on a military base in the U.S.

#### TABLE I

GED Participation and Credentials Issued: Percent Change' From 1995 to 1996

☆ In 1996, 758,570 adults worldwide completed the GED battery, nearly 5 percent more than in the previous year.

#### FIGURE I

Number of People Who Completed the GED Test Batteries in 1995 and 1996, by Region

- Examinees who completed all five tests in the GED battery, either for the first time in 1996 or by retesting from previous years.
- This percentage is based on the number of examinees who met their jurisdiction's score requirements divided by the number completing the entire battery, either for the first time or by retesting from previous years.
- For all tables in this report, the number taking the tests and the number of credentials issued in Colorado in 1996 are underreported from the actual number of persons receiving credentials that year.
- 4. N/A=Not Available.
- 5. This number includes high school students who participated in special pilot GED programs for in-school youth. In 1996, the American Council on Education (ACE) decided to discontinue in-school youth testing. These projects will be phased out by the year 2000.
- 6. For all tables in this report, the 1996 statistics reported for New Jersey are based on preliminary and incomplete
- 7. For all tables in this report, the number of persons counted for Canadian military were persons tested on military bases in Ontario and Quebec.

## TABLE 2 Testing Volumes

- ★ More than half a million (542,578) people met their jurisdiction's score requirements for passing the GED. This number represents about 72 percent of those completing all five tests.
- ★ In addition to those who completed all five tests, 109,232 completed part of the battery in 1996 and may be eligible for a credential in subsequent years.
- ★ In 1996, Texas became the first jurisdiction to test over 100,000 persons in a single calendar year.

TABLE 3
Number of People

Number of People Tested and Percents by Age Group

Among those taking the GED Tests in 1996, more than three in five (61 percent) were age 20 or older.

#### Program Total 867,802 2.5 10.7 14.0 11.4 24.6 12.7 9.0 6.6 6.0 1.9 0.5 25.0

#### FIGURE 3

Number of People Who Took the GED Tests in 1996, by Age Group

TABLE 4
Number of Credentials' Issued
and Percents by Age Group

1.	In many states, the issuance of credentials is a two-stage process. First, candidates must attain scores on the GED Tests that meet their jurisdiction's requirements for a high school credential (see Tables 12 and 13). Second, they must submit an application to their jurisdiction—in some cases with an additional fee—in order to receive their credentials. Issuance of credentials may be delayed or denied if the jurisdiction's administrative or other requirements are not met, or if the jurisdiction experiences severe backlogs in processing applications. Thus, persons who meet GED score requirements in a given year may not receive their high school credentials in the same year. And some may choose not to apply for them. Therefore, in a given calendar year, the number of credentials may not always equal the number of persons meeting the jurisdiction's score requirements.

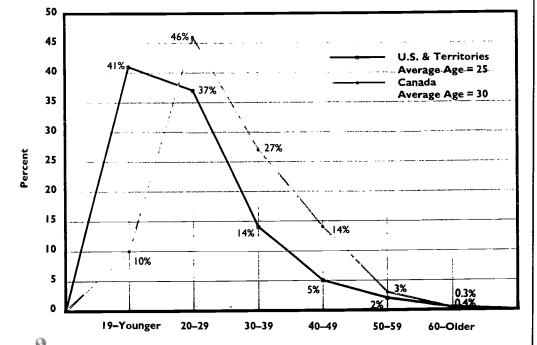

- In Pennsylvania, credentials reported for persons ages 16 and 17 are issued automatically when these individuals reach age 18.
- 3. Percentages reported for the categories US+Territories, Canada, and Program Total are calculated by dividing the total number of persons in the age group by the total number of persons in the category. Missing data are excluded from these statistics.
- 4. The number of credentials issued in Nova Scotia includes those awarded to persons who took and passed the tests on Canadian military bases in Ontario

- Accommodations to standard testing conditions include: extended testing time, use of special reading or optical devices, alternative answer-recording methods, and miscellaneous other adaptations to standard testing conditions. An examinee may be granted a combination of these adaptations as described in the GED Examiner's Manual.
- 2. These numbers represent requests to GEDTS and to jurisdictions for special accommodations based on specific learning disabilities (SLD). For most jurisdictions, this number includes all requests for SLD accommodations—those approved as well as those denied. However, eight states reported only the number of approved requests. See footnote 3.
- 3. This number includes approved requests

#### TABLE 6

Volume of Special Testing Accommodations for Candidates With Documented Disabilities

- ★ In 1996, a total of 5,567 special accommodations to standard testing conditions—time, reading device, answer marking, other—were granted to persons with documented disabilities, a 14 percent increase over the previous year.
- ★ New York provided more testing accommodations (1,152) than did any other jurisdiction—21 percent of the total number of testing accommodations reported in 1996.

#### FIGURE 6

Number of Special Testing Accommodations (1989-1996) and Number of Persons Requesting SLD Accommodations (1990-1996)

Note: Special Testing Accommodations refers to the number of adaptations to standard testing conditions. SLD Requests refers to the number of persons requesting testing accommodations for specific learning disabilities (SLD).

## TABLE 7 Highest Grade Completed

#### Highest Grade Completed

- ★ About two in three (67 percent) test-takers reported completing tenth grade or higher before leaving high school.
- ★ More than one in three (37 percent) reported completing eleventh grade or higher.

- ★ In 1996, 547,096 examinees reported they planned further education and training beyond the high school level. This number is the largest number planning further study in the program's history.
- ★ Six jurisdictions reported large proportions of their examinees planned further education and training:
  American Samoa (94 percent), Missouri (91 percent), Northwest Territories (91 percent), Maryland (88 percent), Virgin Islands (87 percent), and Montana (85 percent).

#### TABLE 9

Credentials Issued, 1986, 1992-1996; Percent Change, 1986-1996; and **Cumulative Credentials** Issued Since 1971

- ☆ The number of adults in the U.S. and Territories earning GED credentials has increased by 17 percent during the past decade. By contrast, the number of adults earning credentials in Canada declined by 18 percent during the same period.
- ★ Nearly 11 million adults (10,997,839) have earned GED credentials since 1971, when the program began reporting this information.
- ☆ Since 1971, Texas has issued more than one million GED credentials.

#### FIGURE 9

16.2 10,997,839

Changes in a Decade: Number of Credentials Issued in 1986 and in 1996, by Region

TABLE 10
Population of Adults Without
High School Diplomas.

High School Diplomas, GED Participation Rate, and GED Credentialing Rate, by Jurisdiction

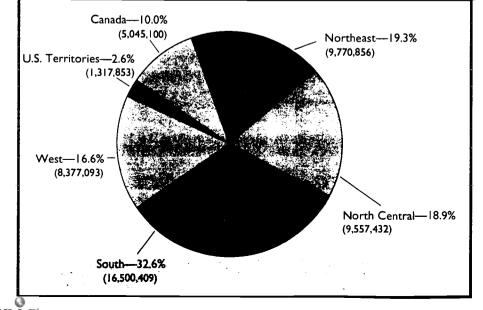

- 1. Population totals for the U.S. and its territories are based on 1990 U.S. Census data for persons ages 16 and older, out of school, without high school diplomas (unpublished document tabulated for the U.S. Department of Education by the U.S. Bureau of the Census, 1993). The numbers are estimates from a 20 percent sample of the U.S. population and are derived from the Summary Tape File 3 (STF3), 1990 Census of Population and Housing. Population totals for Canadian jurisdictions are based on 1991 Canadian Census data for persons ages 15 and older, out of school, without secondary-level credentials or further training (Statistics Canada, 1991 Canada Census; Cat. No. 93–328, Table 5).
- Participation rate is the number of persons completing the GED battery divided by the population of out-ofschool adults without secondary level (high school) credentials.
- 3. Credentialing rate is the number of persons issued GED credentials divided by the population of out-of-school adults without secondary level (high school) credentials.
- 4. N/A=Not Available.
- Population of adults without diplomas reported for Micronesia includes persons in the Commonwealth of the Northern Mariana Islands and the Republic of Palau. Census data were not available for the Republic of the Marshall Islands or for the Federated States of Micronesia.

Population of Adults Without High School Diplomas, GED Participation Rate, and GED Credentialing Rate, by Jurisdiction

- ☆ In 1990, more than 50 million adults throughout North America lacked high school diplomas: 44 million in the U.S., I million in the U.S. Territories, and 5 million in Canada.
- ☆ Worldwide, only I percent of all adults without diplomas earned GED credentials in 1996.
- ☆ Only two jurisdictions surpassed credentialing rates of 2.5 percent: Alaska (4 percent) and Utah (3 percent).

#### FIGURE 10

Source: U.S. Census, 1990; and Canada Census, 1991

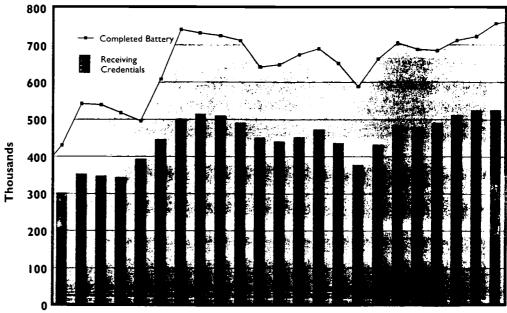

#### TABLE II Trends in GED Testing, 1949-1996

- ★ Since 1949, an estimated 20.8 million persons have taken the GED Tests.
- ★ An estimated 12.6 million persons have earned GED credentials since 1949.
- ★ The number of persons completing the GED Tests in 1996 (758,570) is the highest in the program's history.
- 1. Average number of centers for 18-year period.
- 2. N/A=Not Available.
- 3. Average percentage for years 1954-1966.
- 4. Average for years 1958-1966.
- 5. Total number of credentials issued in years 1949-1966. The number in each year is estimated by multiplying the total number tested by the percentage of people who met state score requirements in that year.
- 6. The number of credentials issued is estimated by multiplying the total number tested by the percentage of people who met state score requirements in that year.
- 7. This number has been revised since the report for that year.

# GED Passing Score Requirements': Percent of High School Graduates Meeting GED Standard and Jurisdictions Requiring GED Standard in 1996

- Jurisdictional requirements are described in the GED Examiner's Manual, Sections 3.8.3-3.8.5.
- 2. Each state, province, or territory that contracts to use the GED Tests establishes its own minimum score requirements. However, effective through 1996, ACE Commission on Educational Credit and Credentials requires that such score requirements be set at a standard no lower than that which would result from requiring: a minimum standard score of 40 on each test in the battery or an average standard score of at least 45 on all tests in the battery. In the United States, this minimum standard of "Minimum 40 or Mean 45" was met by an estimated 75 percent of the 1987 high school norm group. As of January 1, 1997, the minimum standard is "Minimum of 40 and Mean of 45.
- 3. U.S. percentages are based on data from a national sample of graduating high school seniors who took all five GED Tests in the spring of 1987. The percentages reported from Canada are estimates based on the performance of Canadian seniors who took individual GED Tests during the spring of 1987 or the spring of 1988. These percentages were estimated using a conditional probability model.

#### FIGURE 12

Percent of High School Graduates Meeting GED Passing Score Requirements, in U.S. and Territories and in Canada

Note: Requirements are expressed as Minimum and/or Mean scores. Candidates must score the minimum on each test and/or achieve the mean average for the entire battery. This table is based on jurisdictional passing score requirements in effect through December 1996.

# **GED Publications**

#### **General Publications**

Who Took the GED? GED 1996 Statistical Report. Annual statistics about who took the GED Tests during the calendar year 1996. Contains testing and high school credentialing information from participating jurisdictions in the United States, U.S. Territories, and Canada, as well as overseas and in the military. (Order #25-0796; \$20.00)

The GED Annual Statistical Reports. Back issues of the yearly GED statistical reports for 1958-1995. (Order #25-0758-#25-0795; \$15.00 per back issue)

Information Bulletin on the Tests of General Educational Development. A 16-page booklet with information about the GED Tests, including sample test questions and where to call for information about testing locally. (Order #25-0605; Free)

GED Test Accommodations for Candidates with Specific Learning Disabilities. (Order #25-1006; \$1.00)

**GED Items.** The bimonthly newsletter of the GED Testing Service. (Order #25-0401; Free)

Examiner's Manual for the Tests of General Educational Development (1993). Policies and procedures of the GED Testing Program. (Order #25-1001; \$15.00)

The Tests of General Educational Development Technical Manual (1993). Technical information about the GED Tests. The information in this manual is intended for those who select or evaluate tests, interpret scores, or use GED Test results to make educational decisions. (Order #25-1203; \$20.00)

"The Canadianization of the GED": The History and Development of the General Educational Development Testing Program in Canada. (GEDTS Occasional Paper, No. 1, 1987) (Order #25-1206; \$5.00)

The GED Testing Program: The First Fifty Years (1992). Available on request. (Order #25-0608; Free)

#### **Research Studies**

Tests of General Educational Development Bibliography (1997). Revised bibliography of studies and articles related to the GED testing program. (Order #25-1201; \$10.00)

The Literacy Proficiencies of GED Examinees: Results from the GED-NALS Comparison Study (1995). This report presents findings about the literacy proficiencies of adults who take the GED Tests, including passers and nonpassers. The report also provides information about what skills are measured in common by the GED Tests and the National Adult Literacy Survey Scale. (Order #25-0802; \$20.00)

Literacy Skills of Adults and Potential College Students. ACE Research Briefs (1995). This brief compares the prose, doc-

ument, and quantitative literacy skills of recent GED graduates with those of college-educated adults in the U.S. (Order #25-0807; \$5.00)

GED Profiles: Adults in Transition (1990–94). Seven research reports based on the 1989 National Candidate Study and the 1989 GED Test Performance Study. These reports address schooling, employment, reasons for dropping out of school, and test performance of adults who take the GED Tests. (Order #25-0706; \$55.00 for set)

GED Profiles: Adults in Transition. Seven research reports (\$10.00 each):

- 1. GED Candidates: A Decade of Change (1990). (Order #25-0707; Free Introductory Issue)
- 2. Schooling, Study, and Academic Goals: The Education of GED Candidates (1991). (Order #25-0708)
- 3. GED Candidates in the Workforce: Employed and Employable (1991). (Order #25-0709)
- 4. Why Did They Drop Out? Reasons GED Candidates Give For Leaving School (1991). (Order #25-0710)
- 5. GED Test Performance of Adult Examinees and High School Seniors (1992). (Order #25-0711)
- 6. The Gender Gap: Women and Men Who Take the GED Tests (1993). (Order #25-0712)
- 7. GED Candidates: Does Age Make a Difference? (1994). (Order #25-0713)

GED Candidates in Canada: A Report on the 1992 Canadian Candidate Survey (1994). This report addresses demographic background characteristics, schooling and study experiences, employment experiences, and academic and employment goals of adults who take the GED Tests in Canada. (Order #25-0714; \$15.00)

Outcomes of GED Graduation: An Annotated Bibliography of Research Reports (1993). Annotated bibliography of educational and economic outcomes research. (Order #25-1202; \$5.00)

Does the Key Fit the Lock? A Review of Research on GED Recipients in Community Colleges (1993). This analytical review of the literature examines the educational experiences of GED recipients in two-year colleges. (Order #25-0801; \$5.00)

Relationship of the GED Tests to Skills Needed in the Workplace (1991). Prepared for the GED Testing Service by Pelavin Associates, Inc. (Order #25-1204; \$5.00)

This is a partial list of available publications. For a complete listing, call the GED Testing Fulfillment Service at (301) 604-9073.

\* \* \* \* \*

## **GEDTS Publications Available from Other Sources**

Official Teacher's Guide to the Tests of General Educational Development (1987). Sample items, examinee performance data, and teaching suggestions are included for each section of the tests. Available from Contemporary Books, Inc., 180 N. Michigan Ave., Chicago IL 60601. (800) 621-1918.

Official GED Practice Tests and Teachers' Manual (1991). Half-length and full-length tests, comparable in content, difficulty, and format to the GED Tests. Materials are available in English-language (U.S. and Canadian editions), Spanish-language, French-language, audiocassette, braille, and large print editions. Available from Steck-Vaughn Co., P.O. Box 26015, Austin TX 78755. (800) 531-5015, Fax (512) 343-6854. In Canada (416) 513-6966, Fax (416) 513-6977.
